

Who's got your
back?

SIOBHAN BLACK

- I'm currently the 2nd year biomedical engineering class rep and now I'm running for ENGINEERING COLLEGE OFFICER!
- Over the past 2 years I have been a peer mentor a member of the Engineering staff-student committee, Engineering Programme board and EngArch cultural event committee.
- I haven't been in UCD long but already ive protested with the SU, ive listened to students from all different years and seen the behind the scenes of how our college is run.
- I know there is a lot that can be improved and I believe that I can make some improvements that will be around even after I leave UCD

VOTE #1

**ENGINEERING
COLLEGE OFFICER**

MY GOALS ✨

COMMUNITY ✨

Engineering is such a big college and we are so diverse but it's really difficult to get know new people in your stream, your year, or the years above and below you. Even in a small stream like biomed, we have not had a module by ourselves to give us the opportunity to even recognise the faces of other people in our stream.

Time off lectures and labs for an ENGINEERING DAY

Reach out to class reps and provide support to organise more inter-disciplinary gatherings and events

Increase focus on cultural events to show the diversity our college has and promote a sense of community across year groups

LOBBYING ✨

The engineering building and newstead DO NOT fit the needs of our students and we need investments in our facilities so we don't feel the need to RUN away from our buildings to eat or study!

MORE TABLES IN NEWSTEAD

MORE STUDY SPACES AND COUCHES IN ENGINEERING

MORE SCKETS IN LECTURE HALLS.

VISIBILITY ✨

Until I became a class rep, I didn't know what they did other than organise class hoodies. I found it difficult to naivgate supports, I also had no knowledge of what different engineering committees were working on so I felt like no one was doing anything to improve our time at UCD.

Greater transparency for students

Clarify what the SU, class reps and the college officer can do for you

Use social media to keep you updated on whats happening at engineering college council, staff-student committee and programme board.

Encourage more people to attend college council meetings PIZZAAAA

MODULES ✨

Across all streams, all years, it's apparent that lecture recordings, even if not released til a later date, HELP us more than they hinder professors. There's also issues that i would like to address by: moving content from Physics 1 to Physics 2, including more bio modules in biomed stage 2, moving calc 3 to stage 2 to help with electromagnetic fields and the reviewing the relevance of module on history of 20th century architecture for structural students

WEEK OFF IN AUTUMN

ALL LECTURES RECORDED
